

HERO Turf Indoor Care and Maintenance 11-2020

1. Everyday Maintenance - Remove surface debris by vacuuming the HERO Turf with the same vacuum and process you would use to vacuum the carpet.
2. As Needed Maintenance - Brush HERO Turf with a stiff broom to keep blades standing up straight. Areas exposed to high traffic may require more brushing than others. Brush the grass against the grain in high traffic areas. Brushing against the grain will help avoid matting.
3. Stains or residue on the HERO Turf can be removed using a rag and most common multipurpose cleaners. Spray the cleaner directly on the stain to break down stain and then use a clean towel to wipe up stain and dry surface. You can use warm water and a sponge to remove any excess cleaner.
4. For grease or deeper stains, you can use degreasers or solvents to remove. Once finished you can wipe over with detergent and water. Leaving excess detergent on the HERO Turf may leave a residue mark on the turf. You can use warm water and a sponge to remove any excess detergent.
5. For chewing gum spray with aerosol gum and wax remover and scrape out. You can use warm water and a sponge to remove any excess.
